PROFILE

A passionate frontend developer skilled in React.js, Next.js, TypeScript, Node.js and Tailwind CSS. Experienced in building responsive web applications, integrating Sanity CMS for content management, and using Clerk for secure authentication. Focused on delivering high-quality user experiences while continuously learning to stay updated with the latest industry trends.

PERSONAL PROJECTS

• Nike-Style E-Commerce Marketplace

Developed a fully-functional ecommerce website with dynamic content management, product display, category filters, and a user-friendly interface. Features include "Add to Cart" functionality, product details, and responsive design

• Admin Dashboard – Nike website

Developed an Admin Dashboard for a Nike-style site using Next.js, TypeScript, Sanity, and Clerk for secure product management and authentication.

• Blog Website

Built a blog website using Next.js, Sanity, and Tailwind CSS, offering a clean and responsive design. Features include dynamic content management with Sanity, SEO optimization, and fast page load times.

• Resume Builder

Built a static resume builder using HTML, CSS, and TypeScript. It features a clean, responsive layout to showcase personal details, skills, and experience — perfect for sharing online.
